High Visibility

Gemstone sidewall design
adds strength & durability

PLASTICADE® PRODUCTS

GemstoneTM Vertical Panel

Saves space in use, in transit and in storage!

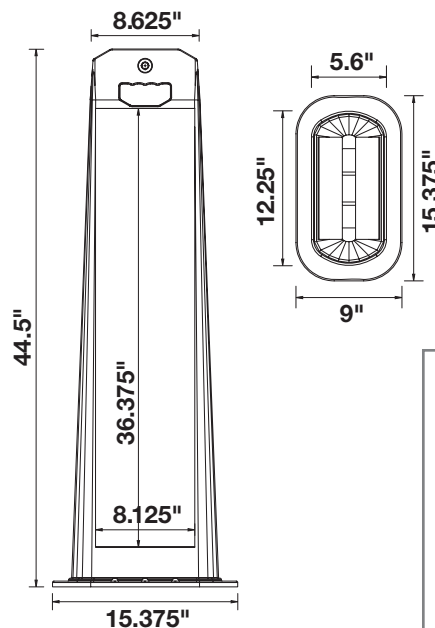

The most visible and space efficient barricades available, Gemstones take up **half the space** of traditional barricades, which means less storage space taken and a minimal footprint during use. And, composed of the best and most durable materials, Gemstone barriers are made to last – from inclement weather, repeated impacts and sun exposure. Best of all, Gemstones are highly visible as a result of their uniquely large reflective area. This means increased safety and awareness!
